

SAHIL MODI

Computer Science Student | Software Engineering | IT Support | Cybersecurity

Orange, CA

Sahilmodi025@icloud.com

github.com/evelynnfly

evelynnfly.github.io

EDUCATION

California State University, Fullerton

B.S. Computer Science

Expected Dec 2026 | GPA: 3.5

OPEN TO

Software Intern

IT Support

Help Desk

Cybersecurity

Technical Analyst

AI/ML

TECHNICAL SKILLS

Languages

Python, Java, C++, JavaScript, TypeScript, SQL, C#, Assembly

Frameworks & Tools

React, Vite, Tailwind CSS, Flask, MongoDB, SQLite, Streamlit, FAISS, Git/GitHub, Linux, Virtual Machines, Unity

Strengths

Debugging, testing, troubleshooting, documentation, user support, security awareness

COURSEWORK

- Data Structures & Algorithms
- Operating Systems
- Databases & SQL
- Computer Communications
- Cybersecurity
- Artificial Intelligence
- Professional Ethics in Computing

LANGUAGES

English

Hindi

Gujarati

PROFILE

Computer Science student with broad hands-on exposure through class and personal projects across full-stack development, AI/ML, systems programming, IT troubleshooting, databases, Linux, and cybersecurity fundamentals. I am still exploring my strongest niche in tech and am open to hands-on entry-level roles where I can learn deeply, contribute quickly, and grow into long-term impact.

SELECTED PROJECTS

Hermit - Property Booking Platform

Python | Flask | MongoDB

- Built a full-stack booking prototype with login, listings, reservations, chat, reviews, and host-facing workflows.
- Organized backend routes, frontend templates, and tests across a multi-feature web application.

Financial Management Dashboard

React | TypeScript | Vite

- Developed a routed dashboard for accounts, transactions, budgets, goals, alerts, and reusable UI components.
- Designed user flows for budgeting, spending visibility, and financial goal tracking.

AI Resume Screening & Semantic Search

Python | Streamlit | FAISS

- Built semantic search that retrieves resumes and documents by contextual similarity instead of exact keyword matching.
- Applied embeddings and vector indexing to improve document ranking and job-description matching.

Operating Systems PID Manager

C++ | Linux

- Implemented bitmap-based PID allocation and release with exhaustion checks, tests, and a fork demo validating parent/child behavior.

EXPERIENCE

Hotel Front Desk Clerk | Family Hotel Business

Jan 2021 - Present

- Support reservations, guest communication, payment handling, and issue resolution in fast-moving hotel operations.
- Handle sensitive guest and payment information with accuracy, discretion, and strong customer service.

Guest Service Operations Associate | Disneyland Resort

Jun 2022 - May 2023

- Supported high-volume guest service operations while staying organized, responsive, and professional under pressure.
- Coordinated with team members to keep service areas clean, efficient, and ready during peak guest traffic.
